

# Peregrine Falcons of the World

*The genetic variation, natural history traits, and morphology of global species*

**Dr. Clayton White**

**Friday, April 25, 6:30-7:30PM**  
**Peavy Hall 130 (Auditorium)**

*(Parking at College of Forestry)*

**Event is Free**

*(suggested \$3 donation to Chintimini Wildlife Center)*

**Live Peregrine Falcons from different continents around the world will be on display!**

Dr. Clayton White is a renowned raptor biologist, author, and the world's leading authority of peregrine falcon subspecies. He has studied the peregrine from Australia to the Aleutian Islands. He will discuss the unique natural history traits, genetic variation and morphology of peregrines worldwide, and what it means to our understanding of adaptation in the animal world. Dr. White will be signing copies of his two books, *Peregrine Quest* and *Peregrine Falcons of the World*, after the event (for sale by Grass Roots Books).
